

JOCAAA ABOUT:

The main purpose of "Journal Computational Analysis and Applications" is to publish high quality original research articles from all subareas of Computational Mathematical Analysis and its many potential applications and connections to other areas of Mathematical Sciences. Any paper whose approach and proofs are computational, using methods from Mathematical Analysis in the broadest sense is suitable and welcome for consideration in our journal. Submission is a representation that the manuscript has not been published previously in this or any other similar form and is not currently under consideration for publication elsewhere. A statement transferring from the authors(or their employers, if they hold the copyright) to Eudoxus Press, LLC, will be required before the manuscript can be accepted for publication. The Editor-in-Chief will supply the necessary forms for this transfer. Such a written transfer of copyright, which previously was assumed to be implicit in the act of submitting a manuscript, is necessary under the U.S.Copyright Law in order for the publisher to carry through the dissemination of research results and reviews as widely and effective as possible. This journal will consider for publication only original research papers that contain proofs for their listed results. Well documented survey articles are also welcome.
