TABLE OF CONTENTS JOURNAL OF COMPUTATIONAL ANALYSIS

AND APPLICATIONS, VOLUME 7, 2005

Table of Contents, Journal of Computational Analysis and
Applications, Vol. 7, No. 1, 2005

| | |
|---|----|
| A comparison between the Adomian Decomposition and the Sinc-Galerkin Methods for solving Nonlinear Boundary-Value problems E. Deeba, Jeong-Mi Yoon, A.I. Zayed, | 5 |
| On the Hyers-Ulam Stability of an Euler-Lagrange type cubic Functional Equation Kil-Woung Jun, Hark-Mahn Kim and Ick-Soon Chang, | 21 |
| q-Hausdorff Summability, J. Bustoz and L. Gordillo, | 35 |
| Iterative Algorithms for Multi-Valued Variational Inclusions in Banach Spaces K.R. Kazmi and M.I. Bhat, | 49 |
| Pointwise Weight Approximation by Left Gamma Quasi-Interpolants, Shunsheng Guo, Gengsheng Zhang, Qiulan Qi, Lixia Liu, | 71 |
| Natural Splines of Birkhoff type and Optimal Approximation, A. Branga, | 81 |
| Asymptotic expansion of a sequence of divided differences with application to Positive Linear Operators, U. Abel and M. Ivan, | 89 |

Table of Contents, Journal of Computational Analysis and
Applications, Vol. 7, No. 2, 2005

| | |
|---|-----|
| On Ostrowski Like Integral Inequality for the Chebyshev Difference and Applications, S.S. Dragomir, | 113 |
| Approximated Leont'ev Coefficients, B. Forster, | 123 |
| Convergence of a Finite Element Method for Scalar Conservation Laws with Boundary Conditions in two space dimensions, Xiaomei Ji, | 135 |
| Uniform Null Controllability of the 1-D finite differences space, Semidiscretization of the Heat equation with locally distributed Control, T. Tebou, ... | 169 |
| Two Sharp Inequalities and Applications, N. Ujevic, | 187 |
| Construction of Upper and Lower solutions with applications to Singular Boundary Value problems, R. Agarwal, D. O'Regan and R. Precup, | 205 |

Table of Contents, Journal of Computational Analysis and
Applications, Vol. 7, No. 3, 2005

| | |
|---|-----|
| Fractional Opial Inequalities for Several Functions with Applications, George Anastassiou,..... | 233 |
| Moments of the Skew t Distribution, S. Nadarajah,..... | 261 |
| On the DCP Property of the Exponential Partial Sums, S. Ruscheweyh and L. Salinas,..... | 271 |
| Improvements of some Ostrowski type Inequalities, A. Aglic Aljinovic, M. Matic and J. Pecaric,..... | 289 |
| A R-order four Iteration in Banach space, Mi Xiangjiang and Wang Xinghua,..... | 305 |
| Numerical Treatment of the two-dimensional Heat Radiation Integral equation, N. Qatanani and I. Barghouthi,..... | 319 |

Table of Contents, Journal of Computational Analysis and
Applications, Vol. 7, No. 4, 2005

| | |
|---|-----|
| Blackman-Type Windows for Sampling Series, A. Kivinukk and G. Tamberg, | 361 |
| A Construction of Wavelets, P. Daffer and H. Kaneko, | 373 |
| On $C^{1,1}$ Constrained Optimization Problems, D. La Torre and M. Rocca, | 383 |
| On the Hyers-Ulam Stability of a Difference Equation, Kil-Woung Jun and Hark-Mahn Kim, | 397 |
| On some Estimations of Kraft Numbers, Y. Je Cho and J. Pecaric, .. | 409 |
| Approximation of State-Dependent Impulsive Ordinary Differential Equations, F. Dubeau, A. Quansafi and A. Sakat, | 417 |
| The Newton Method for Hammerstein Equations, J. A. Ezquerro and M. A. Hernandez, | 437 |
